

a) (i) SYLLABUS: UML DIAGRAMS

Paper 2 Question 8

AFB — Software Engineering II

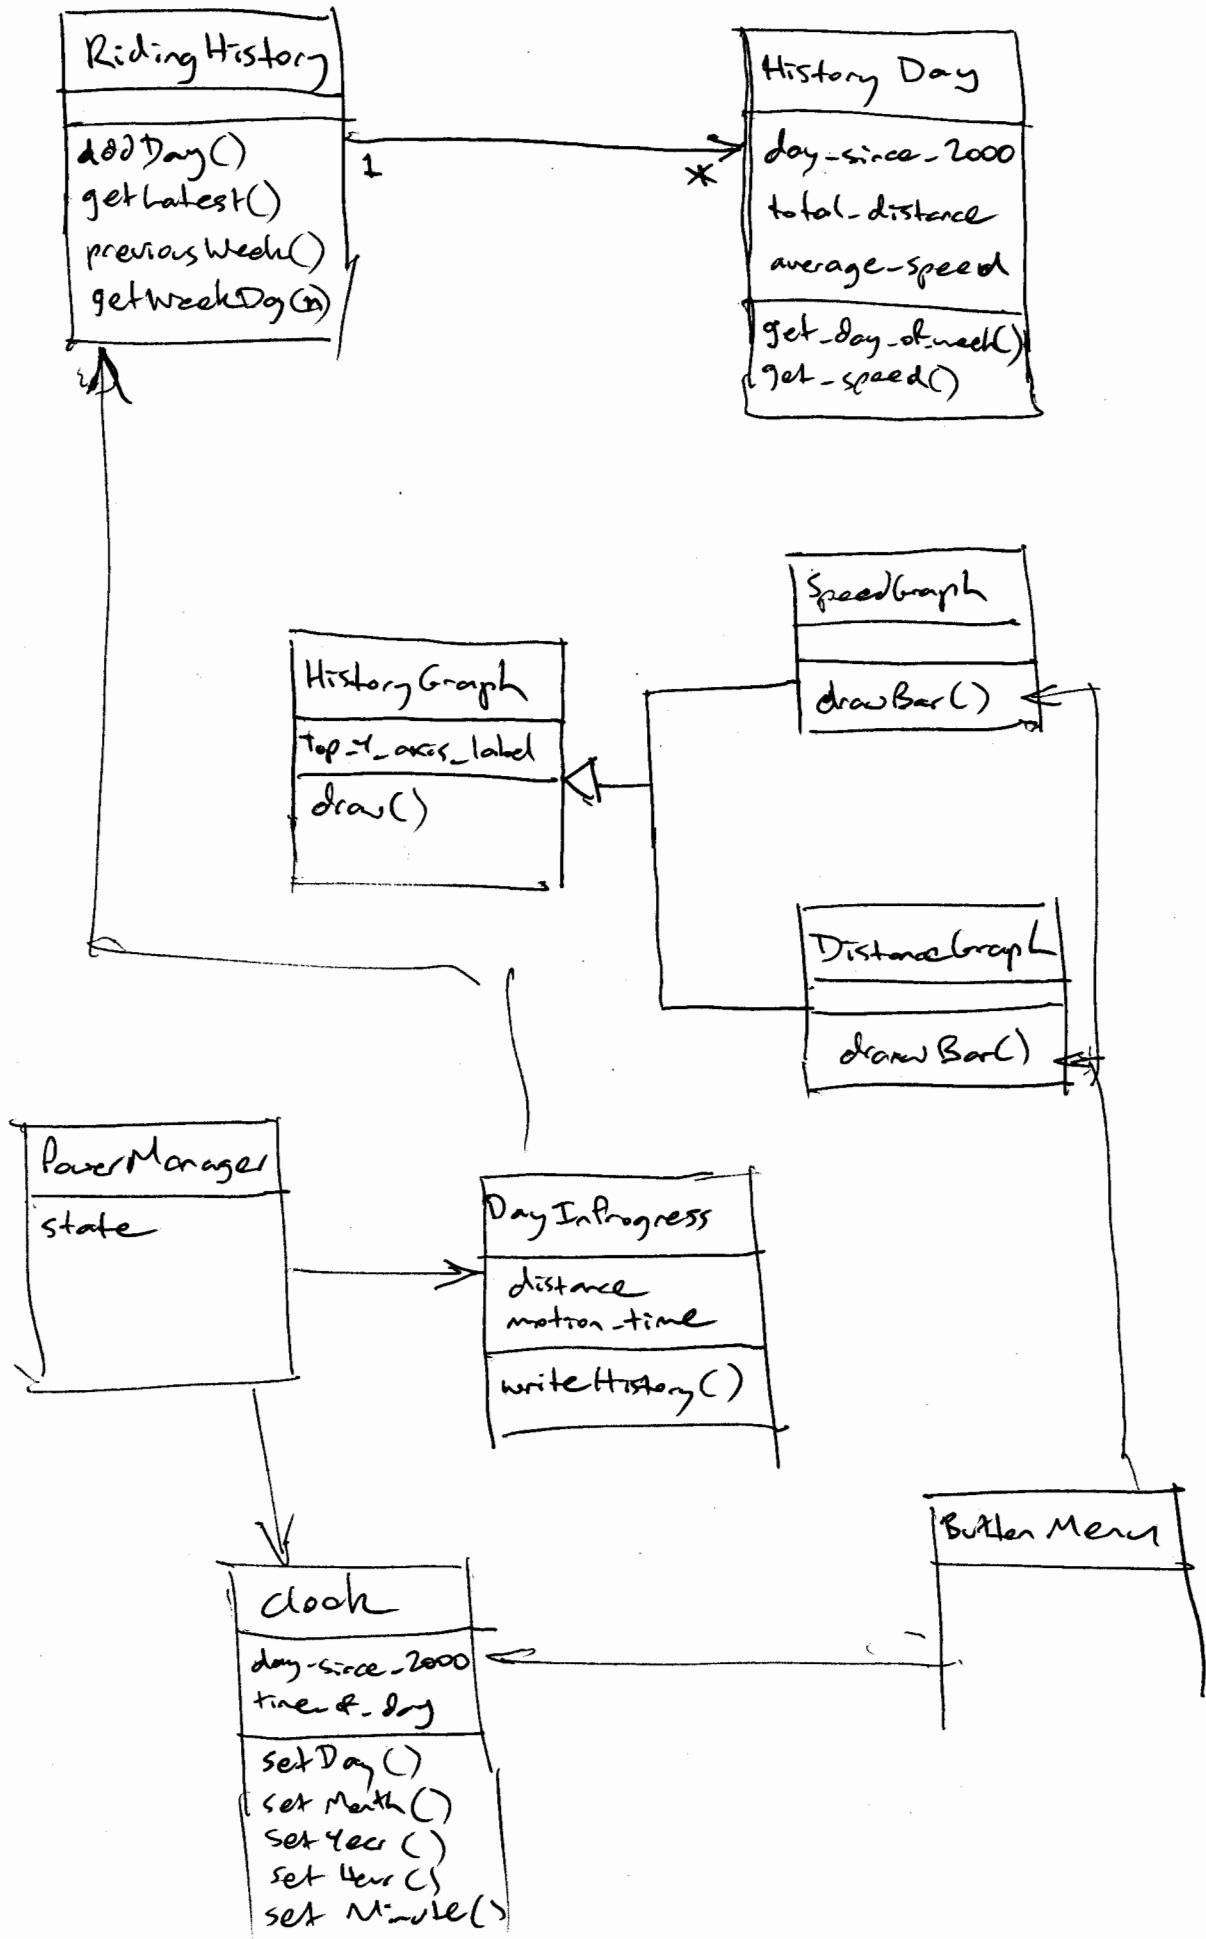

MARKING

- 1 MARK FOR CORRECT DIAGRAM STYLE
- 1 MARK FOR APPROPRIATE USE
- 1 MARK FOR SIMILARLY COMPLETE DESIGN

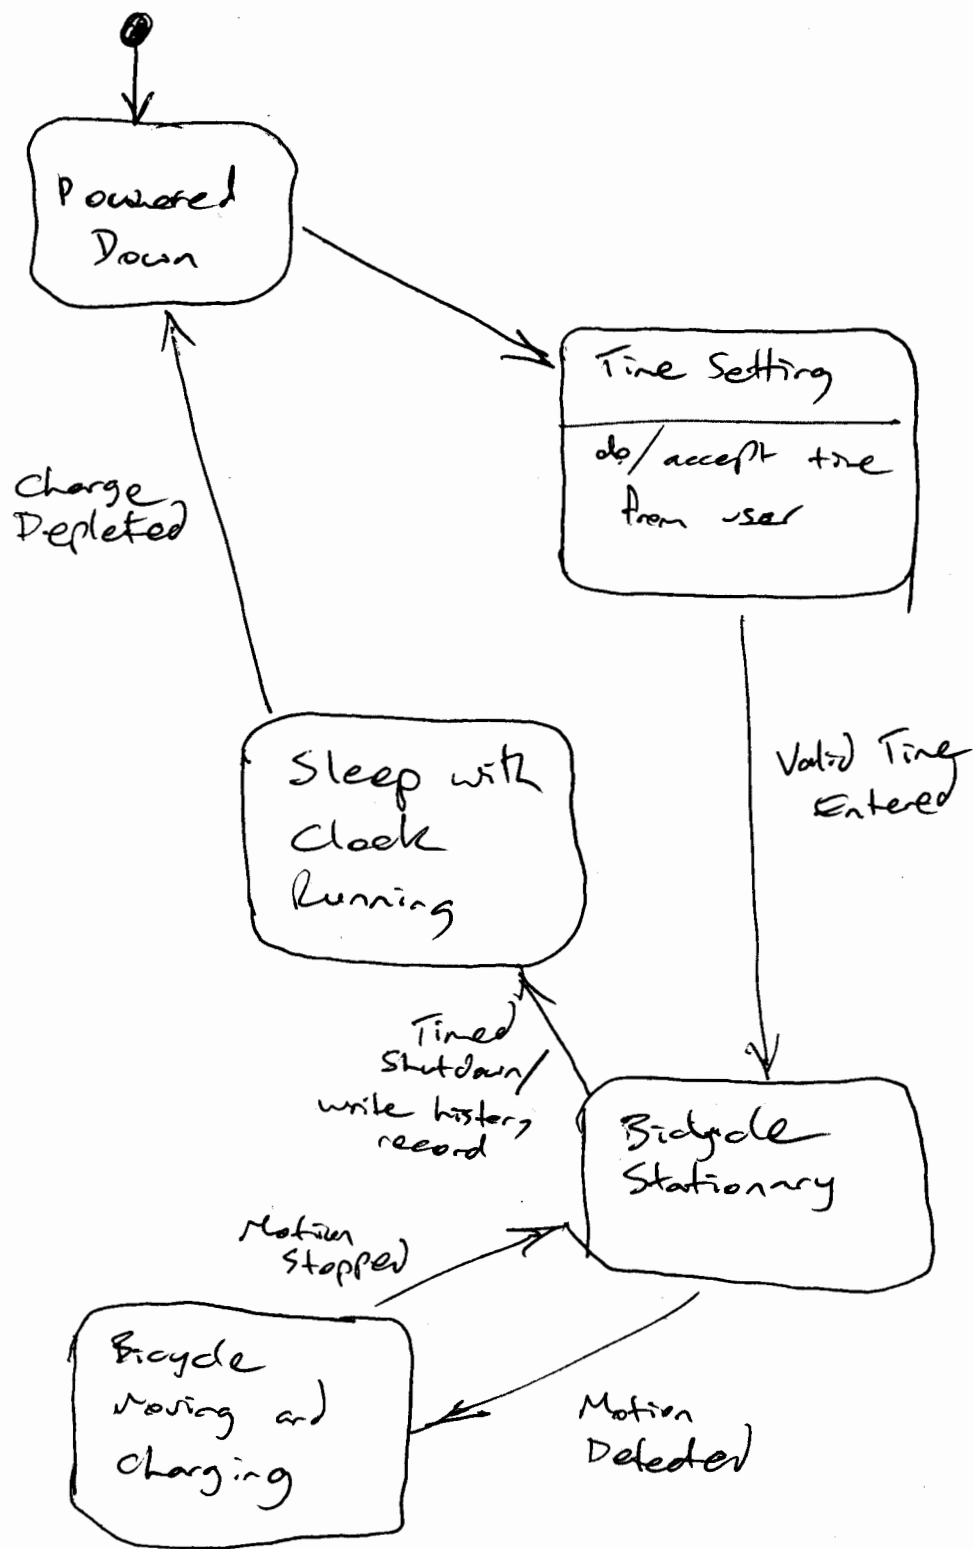

(NEED NOT BE A FULL DESIGN, JUST ADDRESS POINTS RAISED IN QUESTION)

a) (ii)

(marking as for a(i))

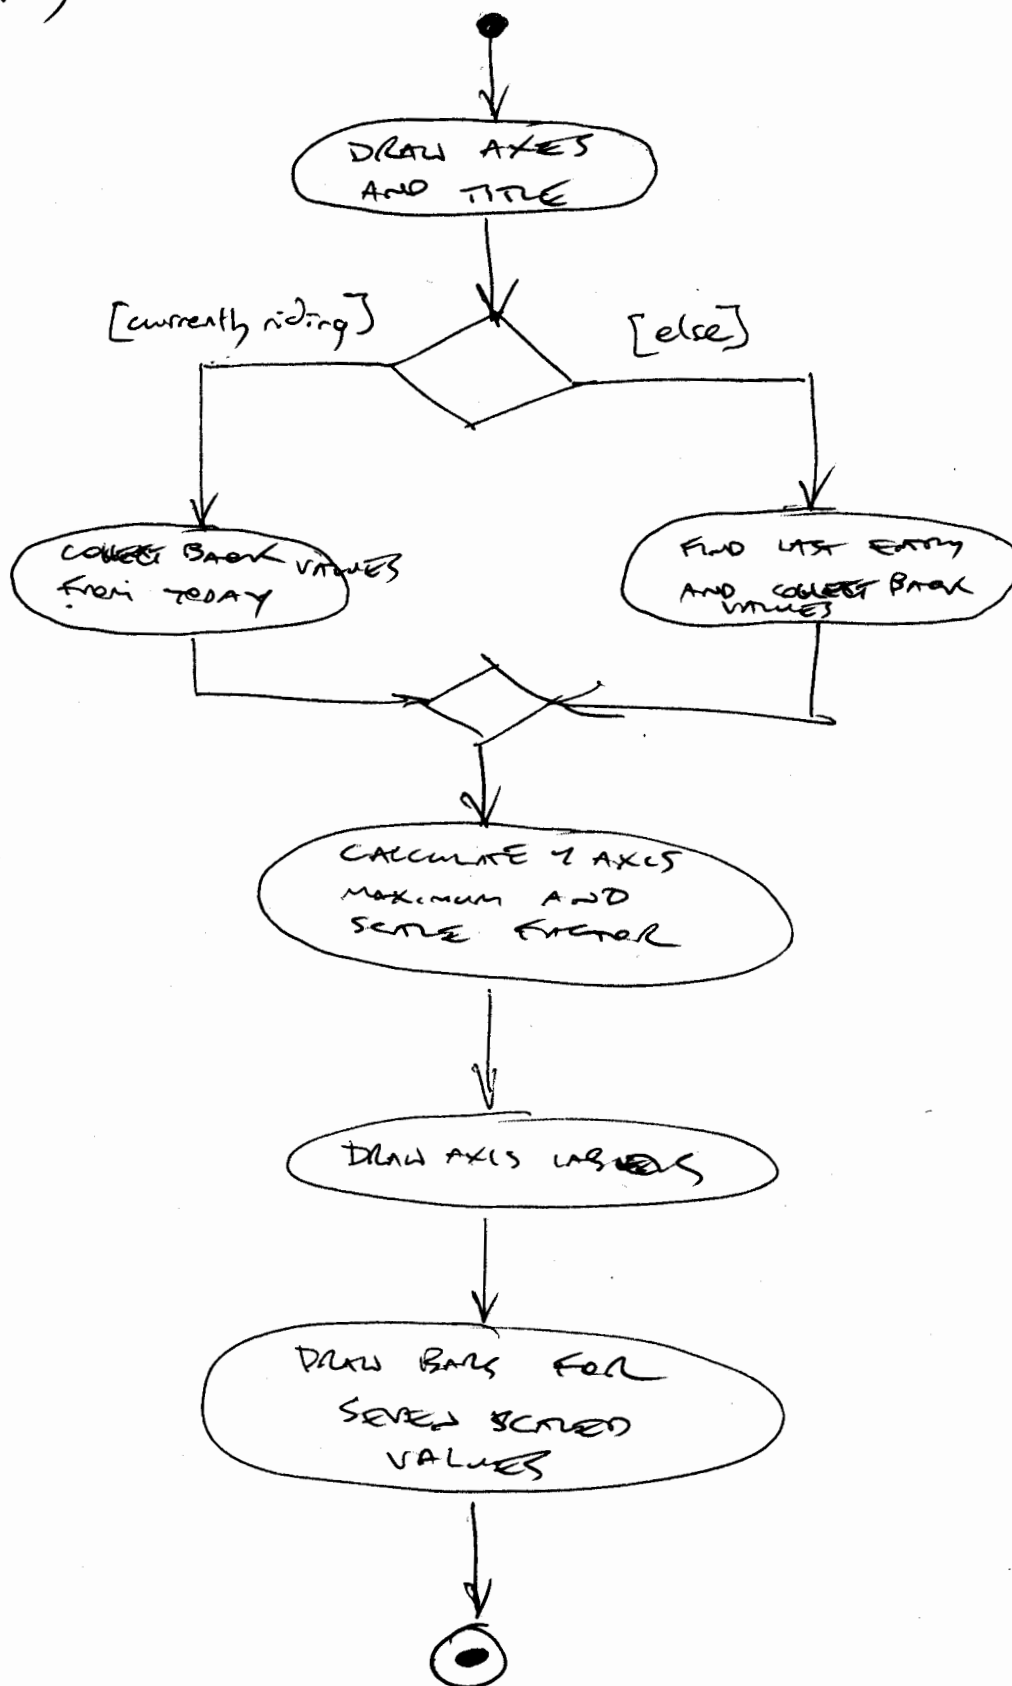

a) (iii)

(MARKING IS FOR a) (i))

a) (iv)

(MARKING AS FOR a(i))

b) SYLLABUS : VARIABLE NAMING AND ROLES

top-Y-axis-label - the role is a
"fixed value", calculated only once

Y-scale-factor - the role is a
"transformation", base derived from top label

max-Y-value - the role this plays is
a "most-wanted" holder

plotted-bar-index - the role is
a "stepper"

MARKING

- 1 MARK EACH (1/2 FOR NAME ONLY)

SYLLABUS : TESTING AND DESIGN PROCESS

- c) Use cases (i) can be verified with respect to user requirements by reviewing with users, marketing personnel, or by trials with user interface mockups.
- class diagram (ii) can be verified with respect to use cases by walking through each scenario, noting responsibilities and collaborations
- state diagram (iii) can be tested against real-time behaviour by simulating power cycle combinations on actual hardware
- activity diagram (iv) could be tested by writing stub routines that render the display on a development system, using simulated historical data

MARKING

- 1 MARK EACH. SEVERAL ALTERNATIVE TECHNIQUES MIGHT BE PROPOSED, AND ANYTHING APPROPRIATE GETS THE MARK
