Information Retrieval 2000

for the evaluation: what data, operational conditions and aspects of your system would you consider, and why? ~~What~~ ~~performance measures would you apply~~ What performance measures would you apply, and why?

10

Slightly tricky : need to pull together points from different parts of the course and relate to particular situation. Can be adequately answered in a pretty straightforward way but plenty of scope for imagination.

System : types of index key, search logic,
          output presentation etc   5
          rationale in form of need, land
          of user etc   5

Evaluation : type and ~~extent~~ size of test
             collection, especially relevance
             assessment, ditto of operational
             ~~data of~~ data   5
             performance criteria and
                 specific measures   5
